Experience

Jaguar Land Rover / Software Engineer

JUL 2022 - OCT 2025, BANGALORE

- **Developed an in-house Python-based desktop tool for ECU communication**, supporting **PDU signals and complete SOME/IP workflows**, replacing third-party testing solutions (Intrepid, Vector, dSPACE) and saving **~£500K in licensing costs**.
 - Built Python-based data pipelines integrating **Jira and BigQuery APIs** to power real-time Tableau dashboards for engineering teams.
 - Created a **Selenium-based automation utility** to extract XML employee data from **20+ internal REST API links** and ingest it into BigQuery for downstream analytics.
 - Developed a **Jira automation tool** that processed supplier Excel files with **thousands of entries** to intelligently create and update tickets at scale.
 - Designed and maintained **40+ organization-wide Tableau dashboards**, achieving **Rank 1 among all Tableau creators** and supporting key decision-making processes.
